CONVECTION

• Techstaves can be used with a custom made stainless steel structure (optional) within tanks to provide premium oak during fermentation and aging.

**SPECIALTIES** 

- Excellent system for long aging periods to create complex, elegant wines with balanced integration.
- Vertical position of staves allows for the grape must and pomace to move freely during the fermentation of red wines.

## TOASTING LINES

CONVECTION Toasts: LT/MT/MT+/HT	A large proportion of phenolic compounds contribute to the structure and ability to stabilize color in red wines. The time and temperature used during the toasting process increases the available polysaccharides which give a sense of volume on the palate.
L 0 N G CONVECTION Toasts: LT /MT/MT+	Prolonged toasting periods from 4 hours and more create a gradual and balanced contribution of phenolic compounds and aromas to wines. A powerful bouquet of concentrated flavors, persistence in the finish, and aromatic potency represent iconic attributes to this line of toast.
