PUMPABLE CHIPS

CHIPS - RICE - POWDER - VINTAGE BLEND

TYPE OF OAK -

FRENCH OAK

(Quercus Petraea)

AMERICAN OAK

(Quercus Alba)

Outdoor air drying between 24 and 36 months

Medium tannin contribution for fermentation, aging and finishing wines.

Pieces of wood between 2 and 8 millimeters, generally used during fermentation, added directly to the crusher or to give a final and fast touch of oak to wine before bottling.

Due to its very fine grain size, the powder transfers its organoleptic characteristics to the wine almost immediately.

Its use during the fermentation period diminishes the defects of the grapes low phenolic contents and shows fast results from the third day of contact, reducing the vegetal characteristics.

Blend of toasted Oak (MT or MT+) and untoasted, a unique recipe formats: Powder, Rice and Chips.

CONVECTION

Toasts: LT / MT / MT+ / HT

A large proportion of phenolic compounds contribute to the structure and ability to stabilize color in red wines. The time and temperature used during the toasting process increases the available polysaccharides which give a sense of volume on the palate.

CONVECTION

Toasts: LT / MT / MT+

Prolonged toasting periods from 4 hours and more create a gradual and balanced contribution of phenolic compounds and aromas to wines. A powerful bouquet of concentrated flavors, persistence in the finish, and aromatic potency represent iconic attributes to this line of toast.

SPECIALTIES

Toasts: Sweet Plus / Intense Plus / Fruit Plus / Pure Plus / High Plus

Thanks to the exclusive software that controls our convection toasting process, we have created unique recipes by using thermodynamic principles with varying time, temperature, humidity, and controlled air flow, generating a new world of flavors and aromas.
